General rules on scientific abstract presentations at PIBD meetings

PIBD provides platforms for oral and poster presentations of scientific findings, usually submitted in abstract form, at the international symposium and other meetings. The presentations should focus on the presentation and discussion of scientific data and should not in any way be abused for marketing or advertising purposes. Any financial support by commercial companies and any other ties to commercial companies such as employment and honoraria must be transparently disclosed. The use of brand names of commercial products should be avoided, unless the disclosure of brand names is necessary for the understanding of the abstract or presentation in which case the brand name should not be used more than once. The name of companies linked to the research should be disclosed but **no company logos should be used in scientific presentations** in order to avoid even the suspicion of undue promotional activities.
